GSA MAS
Contract #47QRAA20D009J

AFG has been supporting the federal, state and community court systems for over 15 years.

Our courts and criminal justice clients require special care and attention during any renovation and construction project due to their exact program requirements, time demands, and sensitivity of their operations. All our projects have required that court operations remain in session during the renovation and construction.

AFG's veteran staff, many of whom have worked as owners and facility managers, will successfully represent stakeholder's concerns,

and ensure the seamless coordination of processes to achieve the goals.

The firm's select group of top-level, dynamic managers will expertly administer the challenges of projects large and small – flexibly and efficiently. AFG works closely with contractors, issues are addressed immediately, options are offered, and solutions are developed. In short, **AFG is the right partner to get the job done.**

PROJECT SPOTLIGHTS

PENSACOLA FEDERAL COURTHOUSE MODERNIZATION, PENSACOLA, FL - AFG was awarded the \$24.4M project to provide CM services for the repair and alterations to fix water intrusion problems which caused an evacuation in 2015 amid concerns of poor indoor air quality. The facility will service the Northern District of Florida to include five courtrooms and related chambers, the U.S. District Clerk, Pretrial Service and the Grand Jury.

TERRY SANFORD FEDERAL BUILDING & U.S. COURTHOUSE, RALEIGH, NC - AFG is the CM on this \$16M new construction and renovation project to improve recently discovered building security needs; necessary improvements for the relocation of the U.S. Military Entrance Processing Station (MEPS) into the building. Among the upgrades, a new Entrance Pavilion to increase building access and to create separate traffic flow for visitors to both the MEPS and U.S. Courts.
